PRESS RELEASE

Reganto Enterprises Limited announces strategic expansion into ERP, IT Systems, Technology Supplies & EPC Services

New Delhi, March 23, 2026: Reganto Enterprises Limited (“Reganto”), a Delhi based enterprise with a 35-year legacy of service excellence, has announced a significant strategic transformation, expanding into four high-growth business verticals — Enterprise Resource Planning (ERP) Solutions, IT Systems Integration & Infrastructure, Technology & Corporate Supplies, and Engineering, Procurement & Construction (EPC) Services.

This expansion marks Reganto’s evolution into a multi-vertical, full-spectrum enterprise solutions provider, designed to serve the rapidly modernising and infrastructure-driven needs of corporate India.

Strategic Transformation

In response to accelerating digital transformation, enterprise technology adoption, and large-scale infrastructure development across India, Reganto has undertaken a comprehensive corporate restructuring to establish four specialised divisions. Each vertical will be led by industry professionals and domain experts, enabling the company to deliver integrated, end-to-end solutions under a unified strategic framework.

Akshay K. Patel, CEO of Reganto Enterprises Limited, stated:

“This transformation is not merely an expansion of services — it is a reinvention of our enterprise vision. Our entry into ERP, IT systems, technology supplies, and EPC strengthens our commitment to becoming a trusted, single-point solutions partner for our clients’ most critical business requirements.”

Overview of the New Verticals

1. ERP Installation & Implementation Services

Reganto’s ERP Division will deliver end-to-end solutions including business process assessment, ERP platform consulting, implementation, system integration, data migration, training, post-implementation support, and customised ERP development. The division will serve sectors such as manufacturing, retail, services, logistics, and infrastructure, enhancing operational efficiency and digital readiness.

2. IT Systems Integration & Infrastructure Solutions

The IT Systems Division will provide comprehensive infrastructure design, network deployment, cloud integration, cybersecurity implementation, compliance audits, and disaster recovery planning. The focus will be on building secure, scalable, and future-ready IT ecosystems for enterprises of all sizes.

3. Technology & Corporate Supplies

Through its Supplies Division, Reganto will manage procurement and distribution of IT hardware, enterprise software licences, office technology systems, consumables, and government/institutional tender supplies. The objective is to bridge enterprise demand with reliable, quality-assured supply chains and efficient commercial execution.

4. Engineering, Procurement & Construction (EPC) Services

The EPC Division will function as a turnkey project solutions provider across industrial plants, commercial buildings, data centres, renewable energy infrastructure, government, and institutional projects. Services will span engineering design, strategic procurement, and full-scale construction execution with strong emphasis on quality, safety, and regulatory compliance.

Strategic Rationale

Reganto's expansion aligns with key national growth drivers, including India's digital transformation momentum, infrastructure investment under the National Infrastructure Pipeline, "Make in India" and PLI initiatives, and the rapid digitalisation of MSMEs. These macroeconomic factors create substantial long-term opportunities across ERP, IT infrastructure, supply chain solutions, and EPC services.

Commitment to Governance & Quality

All new business verticals will operate in compliance with applicable statutory and regulatory frameworks, including BIS standards, ISO certifications, corporate governance norms, GST regulations, MSME registration, and GeM Portal eligibility for government procurement.

About Reganto Enterprises Limited

With over three decades of industry presence, Reganto Enterprises Limited has built a reputation for integrity, expertise, and innovation. Through this strategic expansion, the company now operates across five integrated verticals, positioning itself as a comprehensive enterprise solutions group dedicated to supporting India's corporate and infrastructure growth story.
